SUMMARY

Machine Learning for time-series in Supply Chain, Forecasting, Wearable Motion, Speech, Audio & Music applications.

WORK EXPERIENCE

- Amazon Web Services, Inc.** **Applied Scientist II - L5 (Forecasting)** **Sep 2024 – Present**
Developed and launched a scalable Demand Forecasting toolkit for AWS Supply Chain, delivering \$378M in net cash flow gains for hundreds of B2B/B2C clients by reducing stock-outs, excess inventory, and manual forecasting effort.
- Designed a custom forecast evaluation metric that quantifies the business impact of forecast error by balancing overstock vs. stockout costs, providing clear monetary tradeoffs in terms of revenue, cash flow, and profitability.
 - Engineered hierarchical forecasting across temporal, spatial, and product hierarchies using top-down, bottom-up and middle-out approaches, plus statistical and ML-based reconciliation, improving accuracy at all aggregation levels.
 - Improved sparse-demand forecast accuracy with a split-peak attention model using holidays, pricing, and promotions, and reduced retraining churn through a custom validation framework incorporating seasonality and vendor lead times.
- Amazon Web Services, Inc.** **Applied Scientist II Intern (Audio, Music & LLM)** **Jun 2023 – Sep 2023**
Developed an LLM with music integration that generates text responses, including music genre, instruments used, mood, and theme, based on music files. Used Encodec audio features in conjunction with FLAN-T5 LLM. [\[Link\]](#)
- Qualcomm, Inc** **Research Fellow (Wearable Sensing)** **Oct 2022 – Sep 2023**
Developed physics-informed generation model with real-time development on edge devices and text-based contextual knowledge driven framework to enhance zero-shot learning in Human Activity Recognition. [\[Link\]](#)
- Amazon Web Services, Inc.** **Applied Scientist II Intern (Speech, LLM)** **Jun 2022 – Sep 2022**
Built an accent-robust speech pre-trained model, improving Speech Recognition by 20.4% and Speaker Verification by 6.3%, across 12 minority accents. Used Domain Adversarial Training with Contrastive Learning on HuBERT. [\[Link\]](#)
- Nokia Bell Labs** **Data Science Intern (Multimodal Time-series & Text Modeling)** **Jun 2021 – Aug 2021**
Developed an ML pipeline to automate ticket resolution. Conducted data cleaning, preprocessing, visualization on time-series semi-structured system-level log corpus, followed by statistical feature extraction and classification. [\[Link\]](#)
- Amazon Web Services, Inc.** **Software Development Engineer Intern (Explainable AI)** **Jun 2020 – Sep 2020**
Built a SHAP-based ML Interpretability framework for AWS Redshift, enabling users to write SQL queries to introspect ML model predictions. Improved query execution speed by 2x and memory footprint by 90%. [\[Link\]](#)

EDUCATION

- PhD in CS - University of California San Diego** **Sep 2019 – Aug 2024**
Thesis: Robust and Data-Efficient Learning for Time-series
- MS in CS - University of California San Diego** **Sep 2019 – Jun 2022**
- BSc in CSE - Bangladesh University of Engineering and Technology** **Jul 2014 – Oct 2018**
